One command for Stack

Posted by Victor - 24 Sep 2012 - 02:39

Hello all!

I need a command that show me all functions of stack when im debuggin windows with my driver from start until fynal of a breakpoint.

can you help me???

Hi Victor,

check the 15) Call stack commands in our "Common WinDbg Commands" list. For instance, you might try "kn", "kb"..

I hope this helps,
Robert
