WinDbg: Posted by Almi	debuo	ging	а	EXE
Posted by Almi	udena - 17	Sep 201	13 -	13:28

Hi there all. I'm a begginer using Windbg, and:

I would like to know, how to debug a EXE file using WinDbg.

In the same way we do for example using OllyDbg: open a EXE file, OllyDbg loads the EXE, and now is possible to trace step by step each assembler instruction.

I'm not able to do this on WinDbg.

Any help?		
Many thanks.
