Hi there all. I'm a begginer using Windbg, and:

I would like to know, how to debug a EXE file using WinDbg.

In the same way we do for example using OllyDbg: open a EXE file, OllyDbg loads the EXE, and now is possible to trace step by step each assembler instruction.

PDF created: 03 Nov 2025, 19:23

I'm not able to do this on WinDbg.
