WinDbug Error – Advice Please

I created a folder for Symbols located as below:
C:Windows

In WinDbg I set a symbol path as below:
SRV*C:WindowsSymbols*http://msdl.microsoft.com/download/symbols/packages/WindowsVista/WindowsVista.6002.090410-1830.x86fre.Symbols.exe

When I open the minidump that I want to analyse I get the following error
Loading User Symbols
Loading unloaded module list
.....
Unable to load image lvuvc.sys, Win32 error 0n2
*** WARNING: Unable to verify timestamp for lvuvc.sys
*** ERROR: Module load completed but symbols could not be loaded for lvuvc.sys

Any advise to help me resolve the issue and get WinDbg working properly would be
Very much appreciated.

Thanks In advance

==========
